

Andy Antonelli graduated Summa Cum Laude, First in Class with a B.S. in physics from Davidson College in Davidson, NC in 1995 and later received a MS and Ph.D. in physics from Brown University in Providence, RI in 1997 and 2001, respectively. He started working in the semiconductor industry with IBM, Intel, and Rudolph Technologies before leaving graduate school but started his professional career at Intel in the Portland Technology Group. He later moved on to Novellus Systems, Lam Research, and Nanometrics which merged with Rudolph Technologies to form Onto Innovation. He has made contributions to metrology, deposition process technology, and process integration including being one of the founding architects of the Rudolph MetaPULSE™ technology and the principal architect of the Onto Aspect™

technology, an innovator in low-k dielectric and hardmask materials and processing, and novel plasma sources. He is currently Senior Director of Research & Development and Fellow at Onto Innovation and architects novel metrology hardware and software. He has 35 issued U.S. patents, has written 65 articles and one book, and is a frequent speaker at international conferences.
