

Zineb Saghi graduated from INSA Lyon (electrical engineering) and obtained her Ph.D. at the University of Sheffield (UK). After a 5-year postdoctoral stay at the University of Cambridge, UK, she returned to France in September 2015 to join the microscopy team in the Nanocharacterization platform (PFNC), at CEA Grenoble. She has a permanent position as a Researcher-Engineer, specialized in electron tomography and fully trained on the state-of-the-art TEMs available in the platform. Her H-index is 22 (Scopus), with 75 publications and one book chapter. She was the leading author in two pioneering studies, one on the prospects and challenges of atomic electron tomography, and one introducing compressed sensing approaches to the microscopy community. Since 2020, she

is in charge of the electron microscopy activity of CEA-Leti at the PFNC.
